Creating User/Session/ event segment for all Dimension in GA4

Step 1: Opening Google analytics with the demo account.

Step 2: Under the explorations tab, click on + icon in the segment.

Step 3: Create three segments – User, session, event.

Step 4: Give necessary conditions which should be satisfied for the purpose of the user.

Step 5: Give some breakdowns which gives some good insights.

Step 6: After these steps you can see the generated insight on the right side.
